For Cashiers Use Only (PROCESS ONLY WHEN FEES ARE VERIFIED)

**SUPPLEMENTAL INFORMATION AND/OR SKETCH OF JOB CONDITION**

BASIS FOR APPROVAL-INFORMATION

INFORMATION ON PROCEDURE FOR APPEAL FROM  
A DETERMINATION OR ACTION BY THE  
DEPARTMENT OF BUILDING AND SAFETY

For the Superintendent of Building or his designated agent to approve a request for modification or a request for alternate material or method of construction he must determine that special, individual reasons exist that make compliance with the strict letter of the ordinance impractical and that equivalency is provided for requests applicable to the State Housing Law. The resulting condition must be in conformance with the spirit and purpose of the ordinance involved. The applicant must provide sufficient information with this application to allow the above evaluation to be made.

Appeal from the determination or action of the Superintendent of Building or his designated agency may be made to the Board of Building and Safety Commissioners. To appeal, the appellant must give special individual reasons that make compliance with the strict letter of the ordinance impractical. Appeals pertaining to State Housing Law provisions require complete evidence to substantiate that the proposed design, material, or method of construction is at least equivalent to that prescribed by the Code. State such reasons or evidence on the front of this form or on a separate attachment.

**CONDITIONS OF APPROVAL FOR USE OF EPOXY INJECTION**

1. A Deputy Concrete or Masonry Inspector shall be employed during all phases of the repair process.
2. All work shall be performed in accordance with the epoxy manufacturer's recommendations.
3. Use of epoxy injection for cracks exceeding 1/8 inch in fire rated elements requires that the epoxy be protected by fireproofing materials that provide the required fire rating of the element being repaired.
4. Core tests shall be taken in accordance with procedures of ASTM C42. Cores shall be visually inspected to verify a minimum of 90% penetration of epoxy into the cracked sections. Cores shall be tested for compression capacity to verify that the repaired cores have roughly the same compressive strength as the undamaged portions of the element being repaired. Cores shall be taken, as a minimum, at the rate of 3 cores per the first 100 feet of crack repair, and at a rate of 1 for each 500 additional length of crack repair. A minimum 3 tests shall be taken for each job. A minimum of 3 cores per day will be required.
5. Copies of the Approval for Alternate Materials, these conditions, and the manufacturer's recommendations shall be on the jobsite during all repair operations.
6. If the cores taken show that the required penetration or compressive strengths have not been achieved, additional cores shall be taken at the same ratio indicated in term 4. These additional cores shall be taken at locations selected by the deputy inspector and as agreed upon by the LADBS inspector.
7. Epoxy injection shall not be used to repair cracks in any elements where the process of obtaining cores with the required height to diameter ratios needed for compression tests would damage the elements.
8. Core locations shall be repaired with materials having the same compressive strengths and modulus of elasticity of the elements being repaired by pressure injections.
9. Epoxy injections for columns to be on a case-by-case basis.

As a covered entity under Title II of the Americans with Disabilities Act, the City of Los Angeles does not discriminate on the basis of disability and, upon request, will provide reasonable accommodation to ensure equal access to its programs, services and activities.
