

CONCRETE VAULTS - PERMITS NOT REQUIRED

A building permit is not required for a prefabricated concrete vault which is located below ground and is used for electrical, gas, telephone, water supply equipment or other similar purposes, provided:

1. The depth of the vault from the ground surface to the bottom of the footing does not exceed four feet.
2. The roof of the vault does not exceed four feet in clear width.
3. Construction of the vault complies with:
 - (a) A Standard Plan approved by the Department (LADBS); and
 - (b) The vault is built by a licensed Type I fabricator.
