

HOW DO I QUALIFY FOR A CHARGE UP L.A.! REBATE?

FOR COMMERCIAL CUSTOMERS:

- You must be an LADWP commercial customer.
- You must install a qualified hardwired Level 2 charger(s) by a licensed contractor.
- You must install an LADWP-approved meter socket for a revenue or non-billing statistical meter.

FOR RESIDENTIAL CUSTOMERS:

- You must be an LADWP residential customer or live in the same household as an LADWP customer.
- The charger must be wall or pedestal mounted at a residence located within the LADWP service area with a qualifying EV registered to the same address.
- Purchase or lease a new or used electric vehicle and install a qualified Level 2 (240-volt) charger with the SAE J1772 charging plug.

Please see www.ladwp.com/ev for complete terms and conditions

HOW DO I APPLY FOR THE REBATE?

- Purchase or lease a new or used electric vehicle (residential customers only).
- Install the Level 2 (240-volt) EV charger(s) per the terms and conditions of the commercial or residential rebate program.
- Download the appropriate rebate application from our website: www.ladwp.com/ev. You may also call 1-866-484-0433 and have an application mailed to you.
- Complete and mail the application and supporting information to:

**LADWP Electric Vehicle Processing Center
P.O. Box 51111, Room 1019
Los Angeles, CA 90051-0100**

All applications must be submitted within six months of the EV and EV charger purchase and postmarked no later than June 30, 2018.

Program may end sooner if rebate funding is expended so act quickly.

For more information and to download an application, please visit www.ladwp.com/ev

CHARGE UP L.A.!!

EV CHARGER REBATE PROGRAM

www.ladwp.com/ev

/LADWP @LADWP /LADWP1 /LADWP

LADWP offers the Electric Vehicle (EV) Charger Rebate Program, "Charge Up L.A.!" to encourage our customers to "drive electric," and to support EV charging infrastructure throughout the city.

FOR BUSINESS CUSTOMERS: Charge Up at Work and on the Go

To foster EV charging infrastructure throughout Los Angeles, LADWP offers a Commercial EV Charger Rebate: Commercial and multi-residential customers can receive up to \$4,000 for each hardwired EV charger purchased and installed.

Chargers which have more than one connector are eligible to receive an additional incentive of up to \$750 per port.

Commercial customers must have at least three parking spaces available to employees, tenants and the public to qualify for one charger rebate. One additional Level 2 rebate is available for each additional 10 parking spaces at the same location, business or property.

A maximum of 20 EV charger rebates are available per business location or multi-residential property.

FOR RESIDENTIAL CUSTOMERS: Charge Up at Home

LADWP wants our residential customers to get charged up about driving electric vehicles by making it affordable to get your house EV-ready.

HOME EV CHARGER REBATE: Receive up to \$500 for a qualified Level 2 (240-volt) EV charger. The rebate is usually enough to cover the entire cost of a Level 2 charger!

BONUS \$250 CREDIT: Receive a one-time \$250 bonus when you install a separate time-of-use (TOU) meter dedicated to your EV.

EV DISCOUNT RATE: To receive the EV discount of 2.5 cents per kilowatt-hour off the base TOU rate, you will need to contact LADWP to install a dedicated EV TOU meter for your charger.
