Description of Project and LEA's Determination

The America's Recycling Company Material Recovery Facility (MRF) and Transfer Station is an approximately 0.9-acre medium volume transfer station located at 8832 Bradley Avenue in Sun Valley, California.

On December 3, 2020 the LEA received from America's Recycling Company an application for a Registration Permit for a medium volume transfer station that would replace the existing Enforcement Agency Notification and increase the tonnage from 15 tons per day (tpd) to 100 tpd of solid waste. The application package contained a completed registration permit application form, a facility plan, a notification letter to City Planning and a statement that no meetings were required for this project.

The LEA found that the application package meets the filing requirements pursuant to Section 18104.1 of Title 14 of the California Code of Regulations. The registration permit is a non-discretionary permit and does not require the applicant to submit evidence of CEQA compliance. Therefore, the LEA has issued a Registration Permit on December 30, 2020 to America's Recycling Company to operate a medium volume transfer station.
