Description of Project and LEA's Determination

The Express Disposal, Inc. Transfer and Processing Facility is an approximately 0.13-acre medium volume transfer and processing facility located at 2221 Washington Blvd., in Los Angeles, California.

On July 29, 2023 the LEA received from Express Disposal, Inc an application for a Registration Permit for a medium volume transfer and processing facility that would replace the existing Enforcement Agency Notification and increase the tonnage from 15 tons per day (tpd) to 100 tpd of mixed solid waste. The application package contained a completed registration permit application form, a facility plan, a notification letter to City Planning and a statement that no meetings were required for this project.

The LEA found that the application package meets the filing requirements pursuant to Section 18104.1 of Title 14 of the California Code of Regulations. The registration permit is a non-discretionary permit and does not require the applicant to submit evidence of CEQA compliance. Therefore, the LEA has issued a Registration Permit on August 7, 2023 to Express Disposal, Inc. to operate a medium volume transfer station.
