Frequently Asked Automated Inspection Request System (AIRS) Questions

- Question:** "What do I select if the inspection I would like to request doesn't match any of the inspection codes listed for my type of permit?"
Answer: Select the inspection code that most closely matches the type inspection you want to request. When in doubt, select the "Rough..." inspection code or select option 2 at 888-LA4BUILD between 7:00 am and 5:00 pm M-F for Customer Call Center assistance.
- Question:** "If I make a mistake while entering the phone number, permit number, or the inspection code(s), is there a way to correct the mistake without having to complete the rest of the number digits required?"
Answer: Yes, if you make a mistake while entering any of these three numbers, and you realize the mistake **before** you complete the entry of the required number of digits, simply press the "*" (star) key and you will be asked for the entire number again.
- Question:** "Can I cancel, reschedule, add, or correct the information on an inspection that I already requested through AIRS?"
Answer: Yes, but you can't do it using the current version of AIRS. Select option 2 at 888-LA4BUILD between 7:00 am and 5:00 pm M-F for Customer Call Center assistance.
- Question:** "I don't see Fire Sprinkler, Elevator, or Pressure Vessel permit types listed. Can I use AIRS to request inspections for these permits?"
Answer: No, you must contact the inspector directly to request an inspection for Fire Sprinkler, Elevator, or Pressure Vessel permits. If you don't know the inspector's phone number, select option 2 at 888-LA4BUILD between 7:00 am and 5:00 pm M-F for Customer Call Center assistance. This also applies to "Electrical" permits for "Public Safety" since an appointment is required.
- Question:** "If I realize that I should have chosen option 2 for the Customer Call Center or I would rather talk to an LADBS representative, can I navigate back to the Customer Call Center while I am using AIRS?"
Answer: No, unfortunately this functionality is not currently available within AIRS. However, in a future phase of AIRS, it will be possible. For now, hang up, call 888-LA4BUILD between 7:00 am and 5:00 pm M-F and select option 2 for the Customer Call Center.
- Question:** "What is wrong if AIRS indicates that the inspection code(s) I have entered are ".not valid and the system is unable to process your request?"
Answer: You are entering inspection code(s) for the wrong permit type or the inspection code(s) don't apply to your individual permit. Verify the correct permit type for your permit by referring to the upper left hand corner of the title block on your printed permit copy.
